

RS 6101 M VHF COMM TRANSCEIVER

The RS 6101 is VHF 9 channels transceiver especially suited for light aircraft, in particular gliders, motor gliders and lightweight aeroplanes. It may be very useful in sport, agriculture or transport aviation. It incorporates the built-in intercom system providing communication between two pilots. Rugged construction has been employed throughout to withstand conditions of extreme temperature, humidity, vibration and shock. The transmitter-receiver unit meets the RTCA DO 109, DO 110 and DO 138 Env.Cat.DA J/N BAA.
